A black and white photograph of a man with a beard and mustache, wearing a wide-brimmed hat and a red suit jacket. He is holding a revolver with an ornate, engraved barrel. The background is dark and textured.

1979
SKB[®]
Firearms

Built for men who know fine guns

Precision Gunmaking Since 1855

There is no compromise in SKB[®] craftsmanship

SKB quality

Fine-mechanical tolerances set SKB shotguns apart from the others. Solid steel bolts are precision made to exacting specifications. The pride of SKB hand craftsmanship, assuring you of meticulous wood to metal fit and metal to metal fit.

Reversible safety

All SKB automatic and slide-action shotguns feature a reversible safety for either right or left-handed shooters. So easy you can do it yourself quickly—or ask your SKB dealer.

SKB wood is select French walnut

Rich-colored, fine-grained French walnut is standard on all SKB shotguns. SKB craftsmen polish and finish hand selected wood of high-density that gives a remarkable appearance. Polyurethane coatings are also standard

on most of our fine-grained walnut. Some target grade shotguns feature deep, lustrous burl stocks and forearms with hand-oiled finishes.

Elegant engraving

SKB craftsmanship shows up quickly when you inspect the intricately scrolled engraving on most models. Engraving extends onto barrels of many over & under and side by sides and is extensive on their trigger guards. SKB engraving is deep etched on all silver plated models. Lavishly hand scrolled on all steel framed

fancy-grade SKB's. You'll be as truly proud of the way your SKB looks—as you will the way it shoots.

Twin action bars for greater strength

The new SKB slide-action and gas automatic shotguns feature strong twin action bars for superior durability. These solid steel bars assure smooth functioning—no binding. Twin bars also permit the fastest pumping action possible.

ity in barrel walls. All barrels are "trued" for pointing accuracy. You can also be assured of fine machined tolerances in all SKB metal to metal fittings. SKB choking is uniform, too. When we say modified we mean modified. SKB quality. All the way.

Precision metal to metal fit

SKB over & under and side by sides close like bank vaults. Frames are solid steel. Meticulously hand-fitted, over & unders feature cross-bolt locking for tightness. Side by sides have double locking lugs under the barrels. The metal to metal fit is as snug years later as the day these guns were hand-fitted at the factory.

Target grade ventilated ribs

All new SKB automatic and pump models feature target grade ribs on field guns for a better sighting plane. Dissipates heat. This popular new width lets you get on a bird quicker and more accurately. The rib raised higher, too, for perfect eye alignment. Over & unders feature various ventilated rib widths—for personal preference in field, skeet or trap. Ventilated ribs are standard on all SKB automatic, pump and over & under guns (except models with rifle sights).

Single selective trigger

SKB over & unders and side by sides feature our selective barrel button. Located at the top of the gold plated trigger, you simply push the button to select the other barrel. No confusion with the safety having to work both forward and to the side for barrel selection. Positive. Quick. Perfect when you want to switch over to the tighter choke for a far-out flyer.

Duro-Forged[®] steel barrels

SKB special steel barrels are Duro-Forged to exacting tolerances. And for strength and durability. This guarantees you will have no thin spots, thus superb uniform

4 gauges available

A full range of SKB over & unders—.410, 28, 20 and 12 gauge. These shotguns are available in both field and skeet models. SKB automatic, pump and side by side models are available in 20 and 12 gauge.

Silvered frames —solid steel

SKB uses *real silver* plating for an elegant appearance to all silver frame models. All SKB silver plated frames are deep scroll-etched. The highly silvered sides feature intricate Florentine scroll work—designed by true craftsmen. These *solid steel* frames are perfect complements

to the quality hand checkering, gold triggers and scroll-etched trigger guards on many models. SKB silver receivers also highlight the deep bluing. This is the real style and class you expect from SKB.

Full hand checkering

All SKB shotguns are deep-checkered. Our fancy-grade side by side and over & unders are checkered both 20 lines and 22 lines to the inch. True *hand-checkering*, not machine-checkered, cut checkered or press checkered. SKB checkering is crisp and sharp for a quick, true grip. Our stocks are unsurpassed for beauty as well as practicality.

Adjustable to 2 3/4" and 3" loads

The SKB 20 gauge **ULTIMATIC™** XL 900 has a quick-adjusting Hi-Lo™ gas metering system that lets you shoot heavy and light loads. Simply turn to L—for low base loads—with an easy turn

a coin in the slot under the barrel. Set the **ULTIMATIC** to H and you can even mix 2 3/4" high base and 3" magnums in your magazine! No other shotgun has this exclusive SKB feature.

Polyurethane finish

SKB French walnut is given a tough coating of one of the finest *modern* finishes available—Polyurethane. This protective coating has a high gloss, yet it safeguards and beautifully highlights the fine grain and color of

our stock. This durable finish resists scratching and tough field use for a lifetime of pride in your ownership of an SKB shotgun.

The **SKB** Challenge

Compare SKB. Prove to yourself why other fine shotguns can't match our extra features! Comparison tables are shown on pages 4, 6, 8 and 12—listing the outstanding features of SKB—versus the others. Proof that there is *no compromise* in SKB craftsmanship.

SKB since 1855

SKB guns were born in Japan over a century ago. Throughout the world, the SKB name has since come to mean a *premier* line of guns. We take great pride in this hard-earned reputation for fine craftsmanship. Hand craftsmanship. Experienced hands that polish bores, mill receivers, carefully checkered stocks, finely engrave receivers. Hand work that guarantees superior wood to metal—and metal to metal fit.

One of the great pleasures in owning an SKB is not only its superior shootability but its classic appearance and beauty. Look forward to a lifetime of shooting with your SKB.

See page 15 for barrel availability.

Introducing a modern 12 gauge gas operated automatic that handles both 2 3/4" or 3" shells by interchanging barrels. 5 shot capacity. All you need is a second barrel, not a second gun. The ULTIMATIC™ 12 gauge magnum receiver is common to both barrels.

The chrome plated breech bolt, locking bolt, carrier, operating handle—even the magazine tube are easy cleaning. Anti-rust. Cushion ring on end of magazine tube work like shock absorbers to reduce recoil.

Deep etched scroll work and game bird scenes beautify the receiver. Handsome gold plated trigger. Truly tight wood to metal fit.

Wood is selected, fine-grained French walnut. Carefully hand checkered on both stock and forearm. Polyurethane finish has a high gloss to bring out the beautiful grain and color of the wood.

Safety is quickly reversible for either right or left-handed shooters. Quick sighting, target grade ventilated rib is wider—for faster positioning and a better sighting plane. And, raised higher for perfect eye alignment. Barrels are Duro-Forged® of high tensile strength chrome moly steel. Deep, rich bluing. Highly polished. Ray-type sight gathers light and give bright red "glow" for quicker pointing.

The XL 900MR has less recoil than you've ever experienced—with virtually no muzzle jump because of the unique SKB gas-operated system. Super balance. Fast handling. You can't shoot a better automatic!

Field, Trap, Skeet and Slug

The NEW XL 900

A 20 gauge gas automatic that handles 2^{3/4}" and 3" loads.

Interchangeably! No need for a second barrel. Simply set the Hi-Lo™ gas metering system to handle whichever shell you prefer. When you set the XL 900 to H, you can put high base 2^{3/4}" and 3" magnums in the magazine together!

Weights only 6^{1/4} lbs. The ULTIMATIC™ 20 gauge has all the other features of the popular XL 900MR 12 gauge—with the exception of the recoil pad.

The XL 900 features a handsome French walnut stock. Polyurethane finish, rich gold trigger and classic scroll etching on the receiver. Red glow sight, ventilated rib, fine hand checkering.

The most reliable, smoothest, gas-operated automatic you can buy today! The SKB ULTIMATIC.

Hi-Lo™ Metering system

The NEW **7300 Pump**

The newest pump gun on
the market today.

Superb quality in a modern, fast-handling slide action shotgun that's built to last you a lifetime of shooting. This is the great one.

Fast action. Fast pointing. True shootability in both 2½" and 3" magnum field models. Available in 12 and 20 gauge with French walnut stocks and beavertail forearms. Polyurethane finish highlights the fine grain and rich color of the wood. Looks hand-rubbed. Fine hand checkering too. Not pressed or machined.

Ventilated rib is wider—in the popular new target grade style. Raised higher for fast positioning and a truer sighting plane. Duro-Forged® barrels are machined from chrome moly steel. Bluing is deep and highly polished. Bolt is chrome plated for maximum durability, easy cleaning and anti-rust. Red "glow" Ray-type sight assures you quicker pointing.

See page 15 for barrel availability.

Skeet and Trap

7900 skeet

7900 trap

Slide release

Exact wood to metal fit as found on all fine SKB shotguns. Unique slide release—nice and wide—sets immediately in front of the trigger guard *in the middle* for easy access by left

or right-handed shooters. And, the safety is reversible for right or left handers too!

12 gauge field and trap models have recoil pad. White spacers add to the sleek appearance.

Twin action bars

Solid steel bars to assure you of maximum strength. Work smoothly with a short throw to

give you the smoothest pumping action possible.

Shoot a 7300 pump. Available in field, trap and skeet models. A fine addition to the most complete line of shotguns on the market today.

880 Crown Grade

These fine over & unders are hand crafted by men who know fine guns. Masterpieces of superb balance, these precision engineered shotguns can improve your shooting. Fast!

All over & under stocks are French walnut. Rich-colored, full grained woods with deep hand checkering 20 lines to the inch. Crisp and hard for a true grip. Deep, lustrous stocks coated with Polyurethane to resist scratching and denting.

All models are intricately scroll engraved. Deep etched. Silver plated receivers are *real* silver to complement the rich, deep, gun bluing.

These shotguns close like bank vaults. And, they'll do it for life. Over & under frames are forged—then machined and meticulously hand-fitted for tightness. Cross-bolt locking assures a lifetime of dependable performance.

All SKB barrels are Duro-Forged®. Special steel barrels hammered to exact machine tolerances. No thin spots. Superbly uniform. "True" for accuracy. And, barrels are quickly selective. Available in 4 gauges—.410, 28, 20 and 12—featuring a raised ventilated rib with a Ray-type, red "glow" sight on all field models.

Single selective trigger

SKB over & unders feature a selective barrel button. Located at the top of the single trigger, you simply depress to select the barrel you want first. No confusion with the safety having to move both forward and to the side for barrel selection. Positive. Quick.

Selective automatic ejectors

Automatically ejects the fired shell and slightly raises the live round.

Solid steel frames

SKB uses *real silver* for an elegant appearance to all silver frame models. These solid steel frames are machined from forgings. Deep scroll-

etched. The silvered frames feature intricate Florentine scroll work—designed by true craftsmen. SKB silver receivers also highlight the deep gun bluing. The real style and class you expect from SKB.

Cross-bolt lock

Strong. Solid. In the style of fine shotguns, SKB uses cross-bolt locking. The strongest system possible. Serves as a wedge block to stop barrel shifting. In addition, SKB over & unders

have an extra locking lug at the bottom of the barrels.

4 gauges

Both model 500 and 600 over & unders are available in .410, 28, 20 and 12 gauges. Barrels are made of chrome moly steel and Duro-Forged® to exact tolerances. Superb uniformity in the barrel walls. SKB choking is

uniform, too. When we say skeet, we mean skeet. When we say full choke, we mean full.

Metal to metal fit

Superb craftsmanship. SKB over & unders close like bank vaults. Frames are precision machined from solid steel. Meticulously hand-fitted, they feature cross-bolt locking for a lifetime of dependable performance. Fit together as snugly years later as the day they were hand-fitted at the factory.

Elegant engraving

SKB craftsmanship shows up quickly when you inspect our intricately scrolled engraving. Engraving extends onto barrels of many over & unders and is extensive on their trigger guards. Deep etched on all silver plated models. Lavishly hand scrolled on all steel framed fancy-grade SKB's.

400 Field

What ever happened to the fine side by sides you could afford to take hunting? Well, SKB still makes them.

Real shootability. Classic side by sides with intricate scrolled designs on the solid steel receivers. Solid box lock actions with double locking lugs. Automatic safety. Single selective trigger. Selective automatic ejectors.

Fine hand checkering on rich French walnut stocks and forearms. All the rich appointments you want in a side by side.

These guns are also available in classic English styling with straight grip stocks. Few shotguns can match their fit and feel.

Solid steel frames

SKB uses *real silver* for an elegant appearance to all silver frame models. Solid steel frames also feature double locking lugs under the barrel.

All SKB silver plated frames are deep scroll-etched. Highly engraved, the silvered receivers feature intricate Florentine scroll work—designed by true craftsmen to highlight the deep gun bluing.

400 field

Single selective trigger

All SKB side by sides feature a single selective trigger. The barrel selector button is located at the top of the trigger. Simply push to select the other barrel. No confusion with the safety having to work both forward and to the side for barrel selection. Positive, quick switchover to the tighter choke for a far-out bird.

Duro-Forged® steel barrels

SKB special steel barrels are hammered to exacting tolerances. Then Duro-Forged for strength and durability. This guarantees you will have no thin spots, thus superb uniformity in barrel walls. All barrels are "trued" for pointing accuracy. Fine machined tolerances mean all SKB choking is uniform, too.

Selective automatic ejectors

An SKB side by side automatically ejects only the spent shell for faster reloading. Single selective trigger. Button over the trigger lets you select either barrel quickly.

Automatic safety

When you open an SKB side by side, the safety goes on automatically. Safety is on top and separate from the barrel selection button on the trigger. Eliminates confusion under fast shooting conditions.

Precision metal to metal fit

Frames are machined from solid steel. Close like bank vaults. Meticulously hand-fitted, they feature double-locking lugs for tightness. Receiver and barrel will fit together years later in the field—as the day they were hand-fitted at the factory.

SKB® Pump Guns

The New
7900 Pump

The smoothest slide-action possible on a pump gun

Superb quality in a modern, fast-handling slide-action shotgun that's built to last you a lifetime of shooting. This is the great one.

Fast action. Fast pointing. True shootability in 3" magnum. Available in 12 and 20 gauge with French walnut stocks and beavertail forearms. Polyurethane finish highlights the fine grain and rich color of the wood. Looks hand-rubbed. Fine hand checkering too. Not pressed or machined.

Ventilated rib is wider—in the popular new target grade style. Raised higher for fast positioning and a truer sighting plane. Duro-Forged® barrels are machined from chrome moly steel. Bluing is deep and highly polished. Bolt is chrome plated for maximum durability, easy cleaning and anti-rust. Red "glow" Ray-type sight assures you quicker pointing.

Unique slide release—nice and wide—sets immediately in front of the trigger guard in the middle for easy access by left or right-handed shooters. And, the safety is reversible for right or left handers too!

12 gauge field and trap models have recoil pad. White spacers add to the sleek appearance.

Solid steel bars to assure you of maximum strength. Work smoothly with a short throw to give you the smoothest pumping action possible.

SKB® Fusils à Coulisse

Nouveau Modèle
7900 "Pump"

Action à glissière d'une douceur remarquable.

Fusil de qualité supérieure et de fonctionnement rapide, conçu pour résister la vie durant. Il se classe l'un de meilleurs de sa catégorie.

Fonctionnement rapide. Pointage rapide. Tir impeccable en calibre 3" magnum. Choix de calibres 12 et 20, avec crosse et fût en noyer américain, et devant façonné en queue de castor. Fini de polyurethane qui met en valeur le grain délicat et la chaude couleur du bois. Donne l'apparence d'être poli à la main. Fin quadrillage fait à la main qui n'est ni moulé, ni usiné.

Bandé ventillé assez large dans le nouveau style populaire des modèles de tir à la cible, plus élevée pour assurer une position rapide et un plan de visée plus précis. Canons "Duro-forgés," usinés dans l'acier molybchrome. Bleuissage profond et finement poli. Verrou chromé pour fournir une résistance maximale, un nettoyage facile et un fini anti-rouille. Viseur à voyant "lueur" rouge "Ray-Type," assurant un pointage plus rapide.

Un seul bouton de dégagement de la glissière placé en plein centre, devant le pontet, pour l'accès facile des gauchers. Le bouton de sûreté peut également être inversé à l'usage des gauchers.

Les modèles "Field" et "Trap" de calibre 12 sont munis de plaque anti-recul. Des rainures blanches en réhaussent l'apparence.

Les tendons d'acier massif assurent une robustesse maximum. Fonctionne aisément avec une courte action de glissière assurant un jeu des plus doux possibles.

Slide release Dégagement de la glissière

Twin action bars Bandes à action jumelée
